UNITED STATES FOREIGN TRADE

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

JANUARY 1983

FT 130-83-01

Issued March 1983

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Bureau of the Census
Library

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $10.00 ($12.50 for foreign mailing), single issue $1.50 ($1.90 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, documents for merchandise imported during the latter part of a given month may not be received in time for inclusion in the statistics for that month. A number of factors account for this—under the Customs procedue importers may file the import entry summary up to 10 workdays after the date of release of the merchandise and in some cases the release of the merchandise is delayed because of an in-bond movement from one Customs port to another. In addition, late transmittal of documents, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, and other processing problems may occur. As a result, there is a carryover from the actual month of importation to a subsequent month. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

guide to foreign trade statistics: 1979

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1979.

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

FEBRUARY 1983

FT 130-83-02

Issued April 1983

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $10.00 ($12.50 for foreign mailing), single issue $1.50 ($1.90 for foreign mailing).

Bureau of the Census
Library

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

guide to foreign trade statistics: 1979

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1979.

184 pp. $6.50

Make your work or study easy ...fast...and accurate! Use the "Guide to Foreign Trade Statistics: 1979"

SUPPLEMENT 1

Including Part B. Glossary and more

1980 Census of Population and Housing

Users' Guide

Make 1980 census data work for you. Get the Users' Guide, a multi-volume work, which now includes Supplement 1, consisting of:

Part B. Glossary—Provides detailed definitions of population, housing, geographic, and technical terms associated with the census—especially important for people using 1980 data on tape or microfiche.

Sources of Assistance—Furnishes addresses and phone numbers of public and private sector organizations offering a variety of products and services, such as tape processing, area profiles, training, and reference assistance.

Updates—Provide information on new developments relating to the 1980 census. Each update is keyed to the particular point in "Part A. Text" that needs revision.

"Part A. Text," issued in April 1982, covers census data subjects; geographic considerations; reports, tapes, maps, and other products; services available to users; and many other topics central to understanding and using 1980 census data.

Watch for other supplements to the 1980 Users' Guide, including a table finder and a guide to tape contents.

MARCH 1983

FT130-83-03

Issued May 1983

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $10.00 ($12.50 for foreign mailing), single issue $1.50 ($1.90 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

guide to foreign trade statistics: 1979

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1979.

184 pp. $6.50

Make your work or study easy ...fast...and accurate! Use the "Guide to Foreign Trade Statistics: 1979"

UNITED STATES FOREIGN TRADE

General Imports of Cotton, Wool, and Manmade Fiber Manufactures

BUREAU OF THE CENSUS
LIBRARY

APRIL 1983

FT130-83-04

Issued June 1983

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

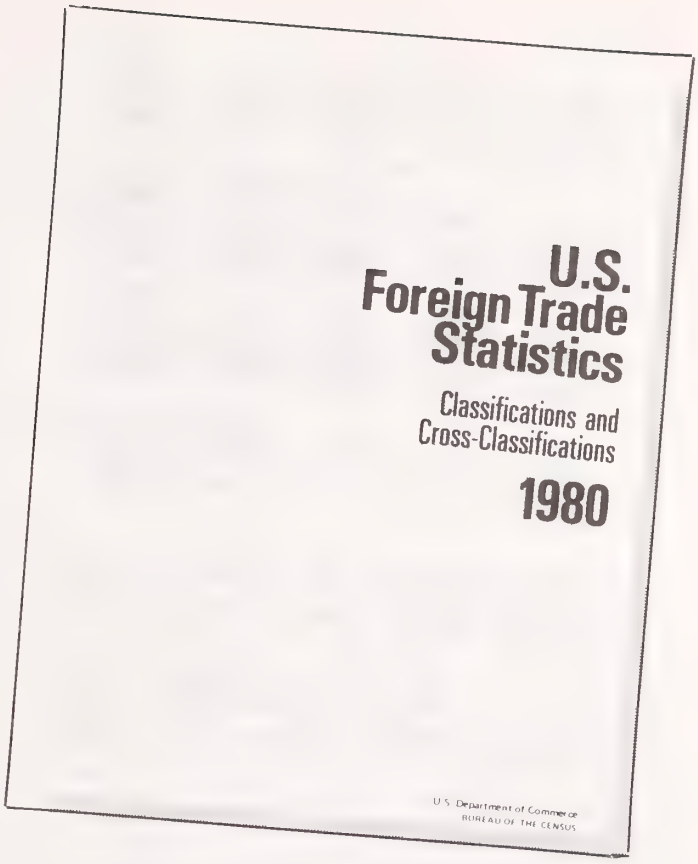
1980 Edition of U.S. Foreign Trade Statistics



Classifications & Cross-Classifications

This publication brings together the basic schedules of commodity and geographic trade classifications currently being used in the compilation and publication of U.S. foreign trade statistics. Included, for example, are the TSUSA (imports) and Schedule B (exports) classifications and their respective correlations to the categories comprising end-use and SIC-based product classifications. Schedule A (imports), including its cross-classification to TSUSA, and Schedule E (exports), which has been converted on a one-for-one basis to Schedule B, also are included, as are the individual Schedule A/E classification number assignments to the item descriptions shown in the selected commodity groupings and commodity tables of Report FT 990, *Highlights of U.S. Exports and Imports.* Similarly, Schedule C-E and C-I (both numerically and alphabetically arranged) and the individual country designations included in summary reports involving geographic trade areas are presented. Each Schedule of foreign trade classifications and/or cross-classifications comprises a separate section of the publication.

For the convenience of the users of this publication, changes which were effective during 1979 to the basic commodity classification systems (i.e., Sections 1 through 10) are presented in the addenda to this publication. Thus, this 1980 edition updates the information contained in the 1974 edition of the *"Cross-Classifications"* and the 1978 edition of the *Correlations of Selected Export and Import Classifications Used in Compiling U.S. Foreign Trade Statistics.* This ready reference to cross-classifications, it is believed, permits better use and interpretation of commodity and geographic trade statistics in summary reports in the current program.

Unless otherwise noted, the classifications in this book are those in effect January through December 1980.

guide to foreign trade statistics: 1979

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1979.

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

guide to foreign trade statistics: 1979

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1979.

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

guide to foreign trade statistics: 1979

Exports...imports...whatever you wish to know concerning foreign trade — the "Guide" offers you the most convenient way to find the facts. The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of thousands of facts relating to imports and exports of the United States. These statistics are designed to serve the needs of both Government and non-Government users who have wide ranges of interests and a variety of reasons for requiring information on foreign trade. The "Guide to Foreign Trade Statistics" includes the listings of data presented in many different arrangements and released in the form of reports available by subscription and in reports and machine tabulations, magnetic tapes, and microfiche offered for public reference use. Up-to-date reports and special tabulations listed show current plans for the release of foreign trade statistical data through 1979.

184 pp. $6.50

Make your work or study easy ...fast...and accurate! Use the "Guide to Foreign Trade Statistics: 1979"

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription **$22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).**

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

FT130-83-09

Issued November 1983

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

Cotton, Wool, and Manmade Fiber Manufactures, by Country of Origin, by Agreement Category

(See the Explanation of Statistics for information on coverage, sources of error in the data, and other definitions and features of the import statistics. Data include 106 commodity categories of cotton, wool, and manmade fiber manufactures)

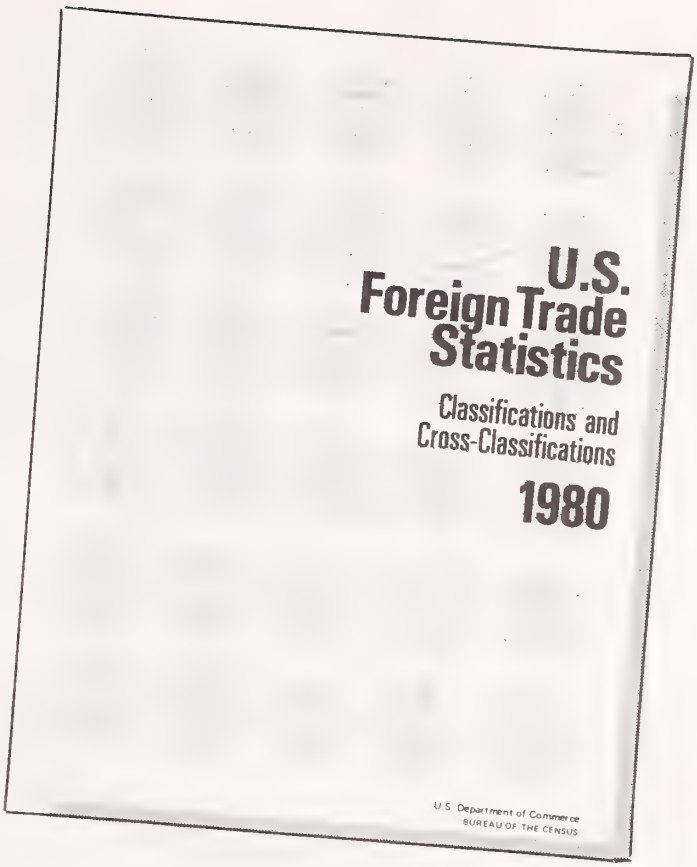
1980 Edition of U.S. Foreign Trade Statistics



Classifications & Cross-Classifications

This publication brings together the basic schedules of commodity and geographic trade classifications currently being used in the compilation and publication of U.S. foreign trade statistics. Included, for example, are the TSUSA (imports) and Schedule B (exports) classifications and their respective correlations to the categories comprising end-use and SIC-based product classifications. Schedule A (imports), including its cross-classification to TSUSA, and Schedule E (exports), which has been converted on a one-for-one basis to Schedule B, also are included, as are the individual Schedule A/E classification number assignments to the item descriptions shown in the selected commodity groupings and commodity tables of Report FT 990, *Highlights of U.S. Exports and Imports.* Similarly, Schedule C-E and C-I (both numerically and alphabetically arranged) and the individual country designations included in summary reports involving geographic trade areas are presented. Each Schedule of foreign trade classifications and/or cross-classifications comprises a separate section of the publication.

For the convenience of the users of this publication, changes which were effective during 1979 to the basic commodity classification systems (i.e., Sections 1 through 10) are presented in the addenda to this publication. Thus, this 1980 edition updates the information contained in the 1974 edition of the *"Cross-Classifications"* and the 1978 edition of the *Correlations of Selected Export and Import Classifications Used in Compiling U.S. Foreign Trade Statistics.* This ready reference to cross-classifications, it is believed, permits better use and interpretation of commodity and geographic trade statistics in summary reports in the current program.

Unless otherwise noted, the classifications in this book are those in effect January through December 1980.

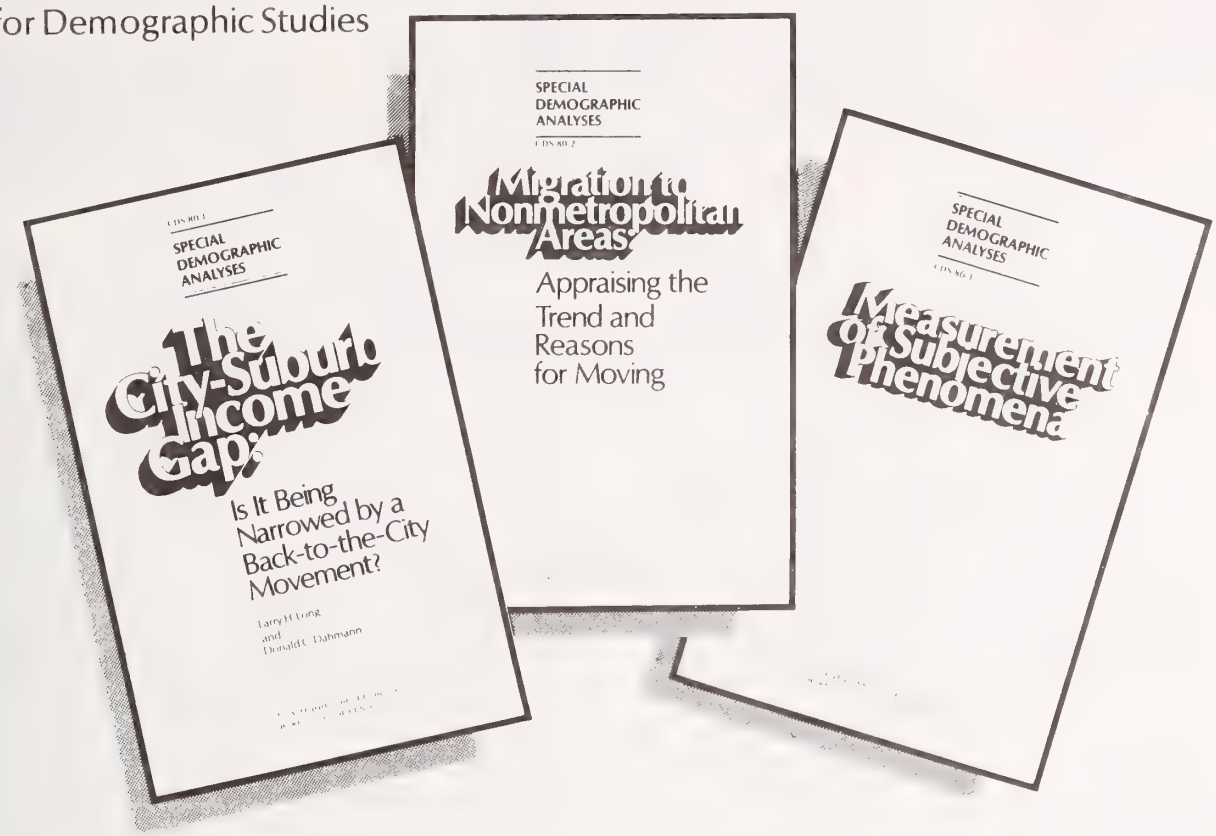
Need analytic but nontechnical presentations?

Use SPECIAL DEMOGRAPHIC ANALYSES— a new series from the Bureau of the Census, Center for Demographic Studies



Initiated in 1980, the series uses a full range of Census Bureau data to provide insight on current demographic, economic, and social trends. The nontechnical style of these publications make them especially useful to public officials, market and policy analysts, educators, and the public.

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

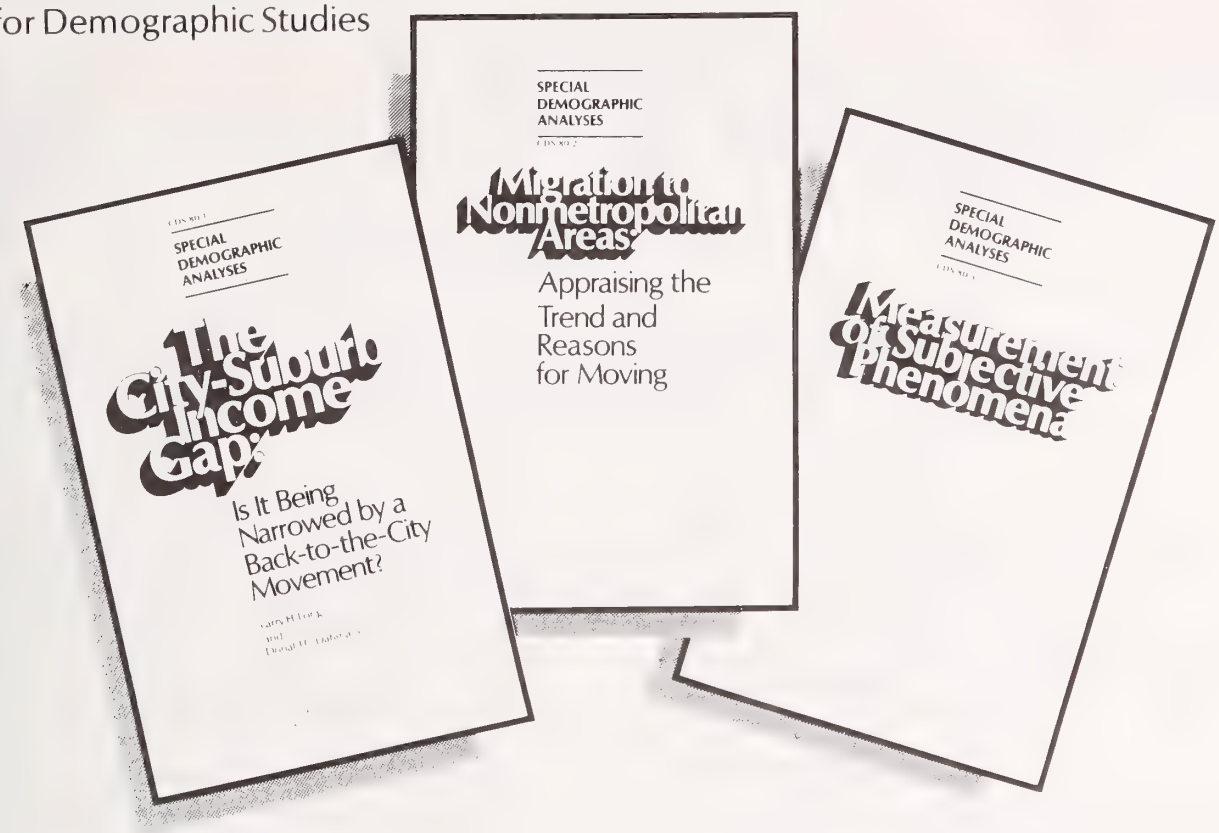
Need analytic but nontechnical presentations?

Use SPECIAL DEMOGRAPHIC ANALYSES— a new series from the Bureau of the Census, Center for Demographic Studies



Initiated in 1980, the series uses a full range of Census Bureau data to provide insight on current demographic, economic, and social trends. The nontechnical style of these publications make them especially useful to public officials, market and policy analysts, educators, and the public.

Issued January 1984

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription $22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.

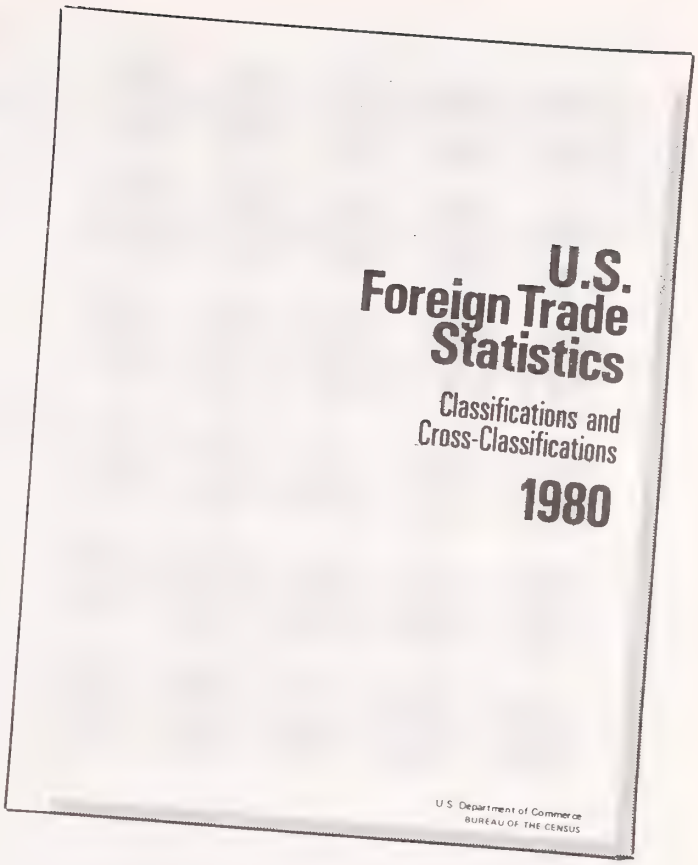
1980 Edition of U.S. Foreign Trade Statistics



Classifications & Cross-Classifications

This publication brings together the basic schedules of commodity and geographic trade classifications currently being used in the compilation and publication of U.S. foreign trade statistics. Included, for example, are the TSUSA (imports) and Schedule B (exports) classifications and their respective correlations to the categories comprising end-use and SIC-based product classifications. Schedule A (imports), including its cross-classification to TSUSA, and Schedule E (exports), which has been converted on a one-for-one basis to Schedule B, also are included, as are the individual Schedule A/E classification number assignments to the item descriptions shown in the selected commodity groupings and commodity tables of Report FT 990, *Highlights of U.S. Exports and Imports.* Similarly, Schedule C-E and C-I (both numerically and alphabetically arranged) and the individual country designations included in summary reports involving geographic trade areas are presented. Each Schedule of foreign trade classifications and/or cross-classifications comprises a separate section of the publication.

For the convenience of the users of this publication, changes which were effective during 1979 to the basic commodity classification systems (i.e., Sections 1 through 10) are presented in the addenda to this publication. Thus, this 1980 edition updates the information contained in the 1974 edition of the *"Cross-Classifications"* and the 1978 edition of the *Correlations of Selected Export and Import Classifications Used in Compiling U.S. Foreign Trade Statistics.* This ready reference to cross-classifications, it is believed, permits better use and interpretation of commodity and geographic trade statistics in summary reports in the current program.

Unless otherwise noted, the classifications in this book are those in effect January through December 1980.

Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories

EXPLANATION OF STATISTICS

Coverage

The regular U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. However, the U.S. Virgin Islands are not considered a part of the United States for textile agreement purposes and therefore will continue to be excluded from the textile program. The regular U.S. import statistics, as well as the statistics under the textile program, exclude imports into Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas.

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States; temporary shipments; low valued nondutiable imports by mail; and other transactions not considered to be of statistical significance, such as shipments of personal and household effects.

General imports, shown in this report, are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise (except for in-transit shipments). The data in this report exclude information on imports valued $250 or less.

Source of Information

The official U.S. general import statistics are compiled by the Bureau of the Census from copies of Foreign Trade Zone documents, the immediate consumption and warehouse entry forms which importers are required by law to file with customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Agreement Category Information

Imported merchandise is reported initially on import entries under the statistical classifications in the Tariff Schedules of the United States Annotated (TSUSA). Data on imports of cotton, wool, and manmade fiber manufactures are presented in this report in terms of the 41 agreement categories of cotton textiles, the 24 categories of wool textiles, and the 41 categories of manmade fiber textiles, respectively.

Quantity Information

The net quantity data presented in this report is in terms of the units of quantity set forth for the agreement categories. In instances where the reported quantity for a TSUSA commodity number is in terms of a unit of quantity other than that required for the category, the TSUSA quantity has been converted to the category quantity through the use of factors supplied by the Office of Textiles of the Department of Commerce. For groupings of commodities for which the unit of quantity "pounds" is reported, the weight represents the net weight of the commodity rather than the weight of the chief textile component of the commodity only.

Abbreviations for units of quantity are shown immediately after the commodity description. The abbreviations being used are as follows:

Abbreviation	Description
DOZ	Dozen
DPR	Dozen Pair
LB	Pound
NO	Number
SYD	Square Yard

Country of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown or manufactured. In instances where the country of origin cannot be determined, the transactions are credited to the country of shipment.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Annual subscription **$22.00 ($27.50 for foreign mailing), single issue $3.00 ($3.75 for foreign mailing).**

Countries and territories for which import data are compiled are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Copies of Schedule C-I are available free upon request to the Bureau of the Census. The schedule is also published as Annex B in Tariff Schedules of the United States Annotated.

Import Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Service releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carryover will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Sources of Error in the Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, country of origin, month of inclusion in the statistics, net quantity and other statistical factors. As indicated above under Source of Information, the information as to net quantity, value, commodity classification, and country of origin is verified by customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Sources of Further Information About Import Statistics

Additional information regarding the coverage and presentation of the import statistics is presented in the Explanation of Statistics of Report FT 135, U.S. General Imports, Schedule A Commodity by Country. Explanations of the import statistics with sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports are included in the current Guide to Foreign Trade Statistics.
